

CHOOSING A COLLEGE

Time Required: 30-45 minutes

Content Standards: Students will complete school with the academic rigor and preparation essential to choose from a wide range of substantial postsecondary options, including college.

Indicators (Students will...): Students will discuss the current relationship between flexible career plans, post-secondary goals, five year high school course plans, report card, grades, standardized test scores, and academic improvement plans, and revise each as appropriate.

GOAL: Students will explore and select possible post-secondary training options, including college.

Activity Statements: Some students may not be planning to go to college and may think this lesson is not for them. You need to advise them that they may change their mind when they become working adults and find out they can get a better job if they get more education. They also need to develop these skills to help others, particularly their own children when they begin looking at their educational options.
