

Forestry Song, Movement 4

.
.
.
.
.
Smother it in a pit and burn it.
.
.
Of the mesophytic mix
but a trace of ash remains.
.
The bark is the efficient transpirer.
.
.
An ascension of sap.
Hot-flash of consumption,
avarice in the full channel,
carbon in ..the bones..
of an expiring stream.
.
.
Was sun called
this breath
to leaf green.
.
(starch: $C^6 H^{10} O^5$)
.
The elaborated sap
through stomates
from the first oxides.
.
.
done
